CORTE E-E' REFUERZO DE BANCOS ESC. 1:50

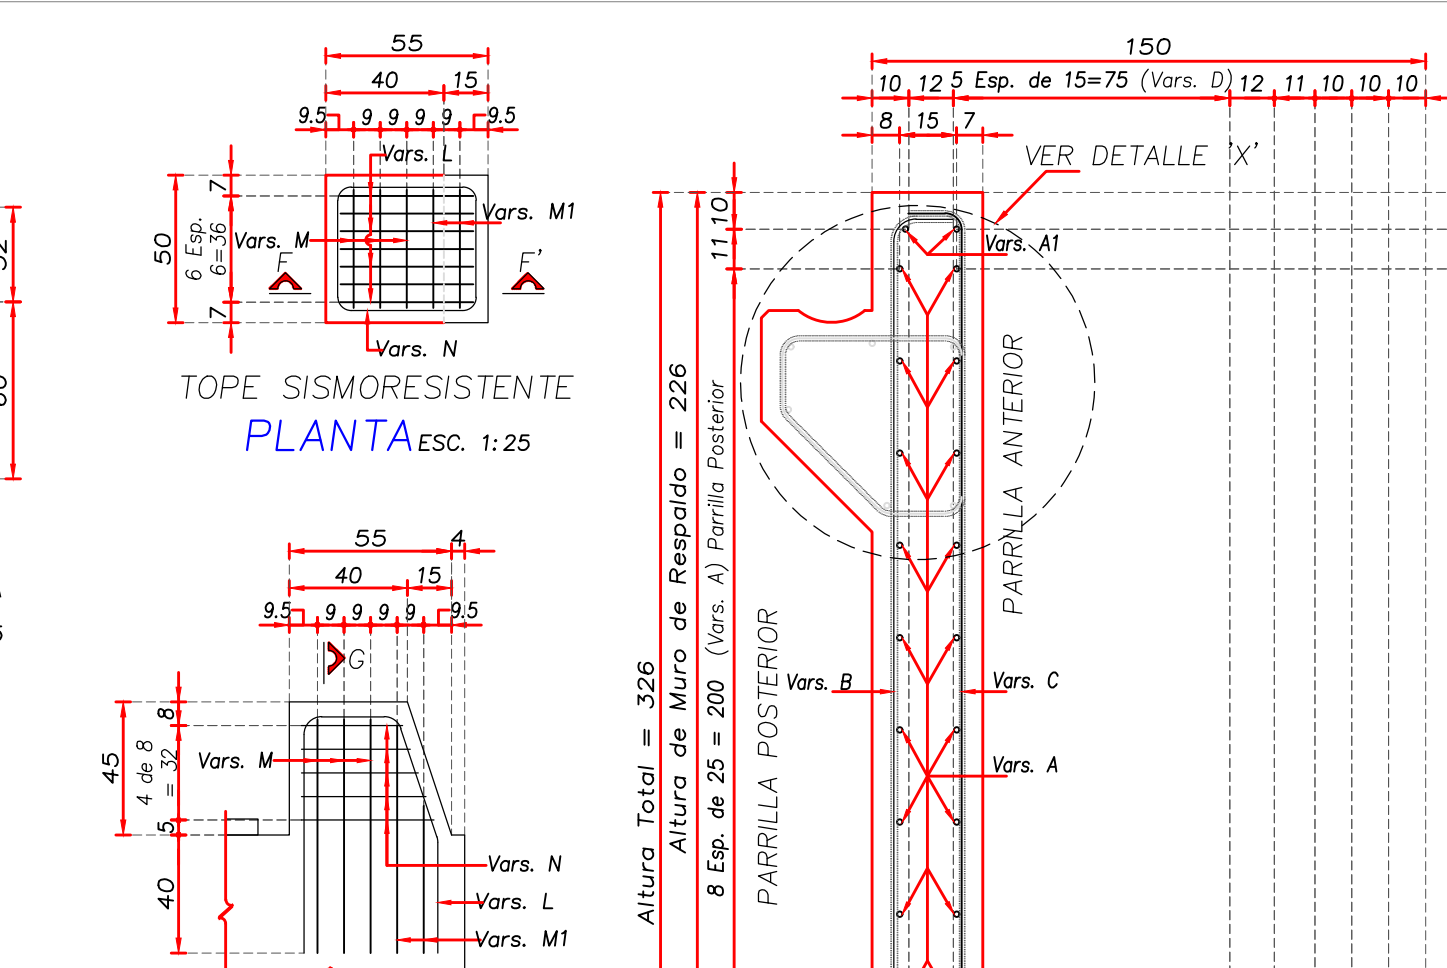

DISTANCIADORES

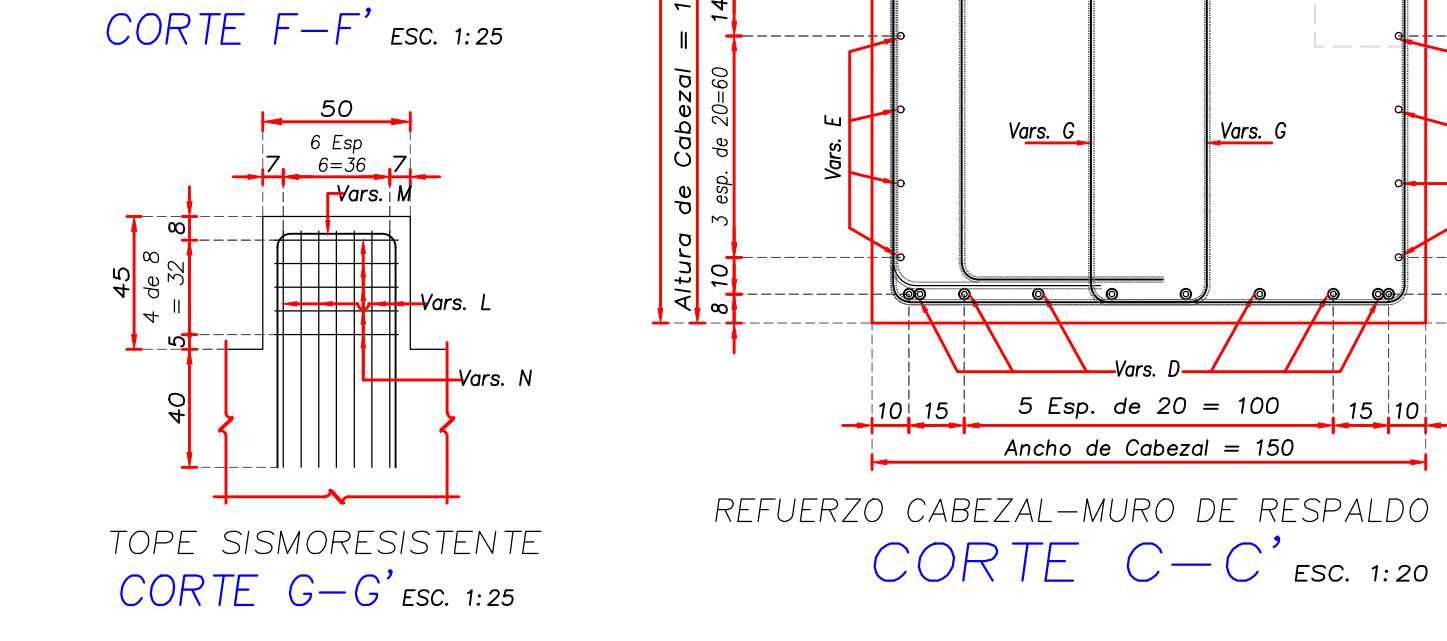

VARIOS DISEÑOS SEGUN RECUBRIMIENTO

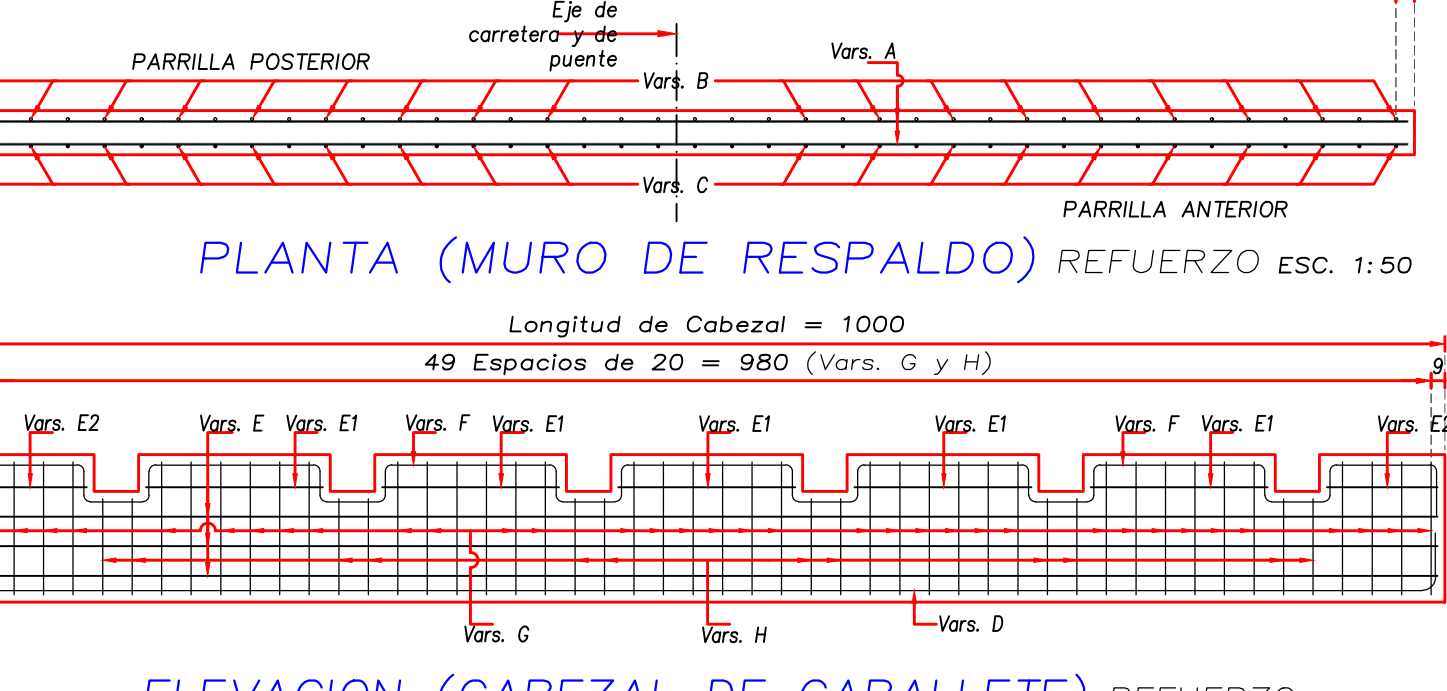

\* Para lograr la separacion de recubrimiento especificada en el proyecto, se recomienda utilizar los "distanciadores de concreto" prefabricados con una resistencia mayor de 250 kg/cm2 como se muestra en la imagen.  
\* Los recubrimientos que cubren los distanciadores son de 25, 35, 50 y 75 mm.  
\* Con este sistema se evita la carbonatacion y por consecuencia la corrosion del acero, evitando el colapso de este.
